Re: Oval Tires - All Classes

The following tire limitations are in effect for the Lucas Oil Raceway and Milwaukee Mile USF2000 events:

- 1. As permitted in the regulations, two (2) sets of new tires will be available for purchase for each registered car at each event for use in the official sessions.
- 2. Only one (1) new set of tires per car will be permitted for the Friday testing session at the Lucas Oil Raceway event. The new set must come from a team's existing inventory, if available, or be purchased at the event.
- 3. Teams will be updated regarding new tire availability for Milwaukee Thursday test session.
- 4. If enough new tires are not available at a minimum ratio of one set for each car entered, new tires will not be permitted for the Thursday test session at Milwaukee.
- 5. If the tire inventory situation improves prior to Milwaukee, restrictions on new tires for the test session(s) may be modified or eliminated.
- 6. New oval specification tires will currently not be sold to teams outside of these limitations (for private testing or otherwise).

USF2000 recommends the preservation of any existing team inventory of new oval specification tires to increase the likelihood that new tires may be permitted for the Milwaukee oval test session.
